

School Nutrition Program

When you have more time to do your job, you have more time to do it well. This is especially true with the School Nutrition Program . At Dynamic Internet Solutions, we provide all the time-saving tools you need to do your job very well, indeed.

We make managing the School Nutrition Program easier.

CNPweb™ is our Internet-enabled Child Nutrition Management System that collects enrollment data, meal counts, financial cost data — virtually all vital information from participants — making tracking a breeze. It's also a highly intuitive system that simplifies the processing of government forms. Making life easier for you, your sponsors and those you deal with on a daily basis.

Why CNPweb is the easy choice.

Easy Corrections - Data entry errors are easily corrected because they are clearly displayed adjacent to the error on the same page. This helps reduce the number of support calls you receive.

Easy Navigation - Breadcrumb — which is popular among commercial Web sites — provides easy traversal of CNPweb. CNPweb “remembers” which pages the user has been to previously and provides instant access to them.

Tracking Changes - Tracking and responding to revisions made to a sponsor's application has been greatly simplified.

Trial Balance - Review results of the claim reimbursement process before final posting.

Audit Trail - A built-in audit trail tracks any changes made to the sponsor's application, claim or any other online document throughout the program year.

Flexible Meal Reporting Options - Supports both sponsor and site-based meal count reporting for claim reimbursement.

Web-Based - Entirely Web-based means 24/7 access. This provides your sponsors the flexibility to work anywhere, anytime, via the Internet.

At-A-Glance-Review - At any time, CNPweb can display the status of all enrollment packets being processed during the program year, as well as those that have been modified.

Program Renewal - When renewing enrollment, applicants need only to update information that may have changed from the previous year.

Completeness - Offers all the necessary online documents for capturing data required by the USDA to enroll in Child Nutrition Programs.

General Ledger - Uses a simple financial accounting system to store and track claims reimbursement financial data. Data for detailed budgets, revenues and expenditures is also tracked.

Claim Upload - Large Districts/Sponsors can upload their claim data. Data can also be extracted from sponsor's point-of-sale system. All or part of the data can be resubmitted if there are any changes before the final reimbursement process is completed. Original and revised claims are handled seamlessly through a system based on USDA guidelines.

Reporting - Incorporates Crystal Reports™ Web-based reporting platform, allowing all reporting to be available via the Internet, including the FNS reports.

Help - Comes with both the online help and comprehensive, well-written, easy-to-follow reference guides for both state and sponsor-level users.

Download - Offers a central location for downloading additional forms that are a part of the enrollment process. CNPweb tracks these forms through an automated online checklist that maintains the enrollment status of each sponsor.

CNPweb features for the School Nutrition Program.

Reimbursement Programs

- Tracks eligibility for Regular School Lunch participation as well as Provisional and Severe Needy
- Tracks eligibility for Regular School Breakfast participation as well as Provisional and Severe Need Breakfast
- Tracks Special Milk and Split Session Kindergarten participation
- Supports Summer Food Seamless Waiver
- Tracks After School Snacks participation
- Meets all Federal requirements for the National School Lunch, School Breakfast, After School Snack and Special Milk Programs

Program Enrollment

- Both Sponsor and Site Application processing
- Supports Permanent Agreement
- Automatically rolls data over from the previous year
- Tracks information on Food Service Management companies
- Collects Financial Report and net cash resource data for Severe Need Breakfast qualification
- Automatically tracks and determines Severe Need Lunch qualification

Claim Processing

- Automatically tracks original vs. revised (amended) claims while still allowing State Representatives to submit revised claims due to an audit or review
- Supports provisional claiming methods
- Tracks 36-month one-time exceptions for all sponsors
- Numerous edit checks validating the integrity of the data being submitted on claims
- Supports both sponsor and site-based reporting when determining meal reimbursement
- Reduces paperwork and eliminates manual data processing and reporting
- Increases the accuracy and timeliness of meal reimbursement payments to schools

Reporting

- Produces the FNS10 and supporting data
- Financial Recap reports for Severe Need Breakfast
- Numerous Sponsor/Site reports for management and analysis
- Tracks the Sponsors and Sites on special assistance and their current base year
- Many other reports are available for this program

More important information about CNPweb.

Software Architecture

- Our creative Child Nutrition Information Management Systems are non-proprietary and utilize N-Tier architecture strategies. Our designs enable seamless integration with complementary systems.
- The driving force behind CNPweb is a series of component-based software programs designed to work seamlessly, allowing for maximum flexibility and expandability.
- CNPweb is completely compatible with most of the popular database servers such as SQL Server and Oracle.
- CNPweb comes with a documented data dictionary, which can be used by any state agency that supports and maintains their mission-critical software systems in-house.

System Requirements

- CNPweb can be installed centrally on a Web server at any state department. DIS can also host and manage your CNPweb system.
- Crystal Reports 8.0 Web-based reporting platform or greater
- Users can access CNPweb using Internet Explorer or Netscape Navigator. We recommend version 4.0 or greater.
- CNPweb can run on low-bandwidth connections. However, a minimum of 56k is recommended. State Representatives should connect through a high-speed access channel such as an Internal Local Area Network, Cable Modem or DSL.

Reimbursement Programs for CACFP

- Supports Child Care Centers
- Supports Adult Day Care Centers
- Supports Family Day Care Homes
- Tracks Centers operating Head Start, Outside School Hours, Emergency Shelters, Homeless Shelters and At-Risk programs

Program Enrollment

- Supports both Independent Centers and Sponsoring Organizations
- Tracks Agreements between Sponsor and Family Day Care Home Providers
- Automatically rolls over data from a previous program year
- As part of the enrollment process, Sponsors provide information in Management Planning, Sponsor Monitoring, Training Schedules, Operating Procedures and more
- Provides flexible Advance Processing, Payment and Recovery
- Tracks detailed budget information for Sponsors of Family Day Care Homes
- Supports numerous business rules and edit checks for all online enrollment forms
- Sponsors can go to a single Web page to see the status of enrollment forms as well as the claims processed for the program year

Claim Processing

- Automatically tracks original vs. revised (amended) claims while still allowing State Representatives to submit revised claims due to an audit or review
- Claims can be submitted for each Provider and/or Center and rolled up to the Sponsor claim, or claims can be submitted at the Sponsor level only
- Tracks 36 month one-time exceptions for all Sponsors
- State has the option of reviewing each claim before payment or allowing claims to be automatically approved for payment when all of the business rules have been passed. Furthermore, the State can apply this discretion across the board or to selected Sponsors only.
- Supports numerous edit checks that validate the integrity of the data being submitted on the claim. However, the State can elect to override certain business rules when necessary.
- Integrated roster of eligibility for validating Free, Reduced or Paid claim enrollment data at the participant level
- Sponsors can view online the earned reimbursement for any claim before it is processed

Reporting

- Produces the FNS44 and supporting data
- Produces numerous State and Sponsor reports for information and financial management purposes
- All reports are easily exported to different file types such as Rich Text Format and Excel spreadsheets from the Web
- Ad-hoc reports can be added to the production report listing without programming
- Mailing labels can be easily processed for all contacts and their addresses
- All reports are processed in real time, eliminating the waiting period for batch processing reports
